

MMB1616 – MidMop Bucket System

The MMB1616 MidMop system is a compact, dual bucket mopping system that incorporates two large buckets, one for clean and one for dirty water.

The Allmops press wringer diverts dirty water rearwards to the dirty water bucket and is suitable for most mops, including flat mops that require wringing.

MMB1616 has been sustainably engineered from the highest quality recycled plastic, using Numatic's innovative ReFlo Technology.

The MMB1616 can also be fitted to the front of either the SCG1805AT or PROCARE200 janitorial trolleys.

- 1 Year Warranty
- Heavy Duty Structofoam chassis using ReFlo Technology
